## SlabStitch™ Announces New Product Features for Crack Repair

February 1, 2013

Deerfield Beach, Florida – The **SlabStitch Concrete Repair System** has greatly enhanced its popular concrete repair product called **SlabStitch™ ST12 Mechanical Stitches** to permanently stitch cracks and fractures that develop in reinforced concrete structures, such as swimming pools, slabs and decks.

Swimming pool professionals searching for new products and techniques are choosing the **SlabStitch** to repair cracks prior to resurfacing Pools, Decks and Patios. In the past, contractors often glued metal “U” clips, staples, and pins around cracks that formed in concrete slabs. Often times this process was not successful and fractures reappeared. More and more contractors are choosing the **SlabStitch** to repair concrete because it provides the optimal combination of strength, installation time, and cost.

***The new and improved mechanical stitches offer many new benefits that help to make the installation process that much easier and effective.***

### NEW PRODUCT FEATURES AND BENEFITS:

- Larger 5/8” anchor and wedge design allows for positive holding values in concrete pool wall, floor, and deck materials.
- More Robust Anchor and Wedge Designed for Easier Installation
- Improved Performance for Heavy Duty Fastening
- Simplified Installation Process
- 15 year Warranty

### TESTIMONIALS:

*I bought a box of mechanical stitches to repair a cracked pool. The instructions were easy to follow and they tightened down nicely. They couldn't have been easier to install. I won't hesitate to recommend them and will definitely use them on my next pool and spa repair. The (ST12 Anchor Stitch) product is a big improvement over stapling.*

**Dan Ellis, Swain Pools & Spas / Tallahassee, FL**

*"I bought two boxes of 10 anchor stitches, installed them, and then went back for three more boxes. I put in 50 SlabStitch stitches on that job and it was a simple process. Since then I installed 30 anchor stitches on another job. Great Product...Met the Rep while at the Distributor and got a glimpse of some new product features, very impressive."*

**Mike LaChance, Pool -X-Perts, Inc. / Deerfield Beach, FL**

*"The SlabStitch product is easy to use. The installation went smooth and I will use them again. In fact, I am recommending them to the builders I know that repair pool cracks."*

**Jim Walker, Pool Emporium / Neptune Corp of the Treasure Coast**

*"The SlabStitch Anchor Stitches are highly recommended as the best solution to restrain future movement in slabs."*

**Shannon Kissane, President Pool and Spa Designs, Inc., Licensed Aquatic Engineering Consultant**
